Facial treatments

for women and men using the QMS method

The skin reflects everything – external influences, diseases or insufficient care. To some extent these factors leave their mark, but they almost always alter the skin structure and among other things, lead to wrinkles and blemishes. A major cause of skin aging is that older skin loses its vitality and the ability to retain moisture.

QMS Cosmetics prevent this from happening. They naturally stimulate the formation of new cells, whereby high-percentage collagen is stored in deep layers of the skin.

CLASSIC COLLAGEN

A modified anti-aging treatment using the unique QMS Medicosmetics Collagen System for the best results. First of all Deep Cleansing and Exfoliant fluid is used to prepare the skin for the algae-based mask which follows. The level of moisture in the skin is significantly increased thanks to the subsequent application of 70% naturally soluble collagens, which work to intensively hydrate the skin and promote cell renewal. A treatment specially developed to rejuvenate and revitalise the complexion. Also ideal for sensitive skin.
